RE: Letter of Recommendation – Larry M. Jacobs & Associates

To Whom It May Concern

It is with great pleasure and appreciation that I write this letter of strong recommendation for Larry M. Jacobs and Associates. Over the past twenty-eight (28) plus years, Caldwell Associates has been fortunate to work with LMJ on a variety of complex projects. LMJ's depth of knowledge and understanding of geotechnical engineering adds significant value to every project they undertake. They offer a practical and innovative approach to their craft.

LMJ's consistent performance has been at the highest level of geotechnical services in the area. Their technical abilities, local knowledge and experience, combined with their embracing of leading edge technology, have insured their continued position as one of the top geotechnical firms in our area. As an Architect, I am grateful for this Firm's consistent practice to apply exceedingly responsive service.

Respectfully,

H. Miller Caldwell, Jr., AIA  
Principal  
Caldwell Associates Architects, Inc.
